MAKING CONSERVATION A CALIFORNIA WAY OF LIFE

ACWA and its coalition partners submitted comprehensive comments to the State Water Board on the August 2023 version of the proposed Regulation. Core to ACWA's comments was the request that the State Water Board work with ACWA, water suppliers, and other interested parties to address the policy and technical concerns in the revised draft.

To achieve ambitious water use efficiency standards, water suppliers must develop and implement new programs requiring long-term customer behavior change and significant investments. Compliance starting in 2025 would be unreasonable, with 42% of suppliers potentially out of compliance and insufficient time for data collection and submission. Adjustments to the outdoor standards timeline are necessary to provide sufficient time for planning, budgeting, staffing, and partnership building, including targeted programs for disadvantaged communities.

One of the highlighted projects receiving funding is the Forest GISLATIVE Projects Plan Phase One-B, spearheaded by the Upper Mokelumne River Watershed Authority (UMRWA) in Amador PICS THAT County. This \$4,739,056 initiative focuses on improving and protecting a 25,671-acre forest stand and wildlife habitat. With CWDIS support from SNC, the project aims to conduct essential fuelsmanagement treatments, contributing to a total treated TORING area of 7,340 acres within the upper Mokelumne River

watershed. Additionally, the SNC grant funds the Forest Projects Plan – Phase Two Environmental Planning, led by UMRWA across Alpine, Amador, Calaveras, El Dorado, and Tuolumne counties. This \$723,542 initiative focuses on landscape-level improvements to forest health and resilience, aiming to reduce wildfire risks and protect vital resources. Senator Alvarado-Gil emphasizes the importance of comprehensive planning, including mechanical, hand, and prescribed burn treatments, alongside forest-management actions like commercial thinning and road decommissioning.

AGENDA

At the April 2, 2024 Legal Affairs Committee meeting, CCWD was grateful to have Chelsea Haines from ACWA present on the proposed regulation.

Making Water Conservation a California Way of Life

2:45 - 4:00 PM

In 2018 the Legislature passed a package of bills implementing former Governor's Brown's vision for "Making Conservation a California Way of Life." The State Water Resources Control Board (State Water Board) is in the final stages of implementing this legislative framework following several years of studies and engagement with interested parties. The Legislative Analyst's Office and Public Policy Institute of California, however, have both raised significant questions about some of the policy decisions the State Water Board has made in its proposed regulations. And the Legislature is considering several bills that could amend the existing legislative framework raising the possibility that the framework could be changed just as the regulatory package is being adopted. This program will include a discussion of the current proposed regulations and how any legislative action may impact that ongoing work.

Moderator:

Julia Bishop Hall, Legislative Relations Manager, ACWA

Panelists

Chelsea Haines, Regulatory Relations Manager, ACWA
Enc Oppenheimer, Executive Director, State Water Resources
Control Board

Sonja Petek, Principal Fiscal and Policy Analyst, California Legislative Analyst's Office

Fireside Chat with Senator Ashby
